

QA TEST REPORT

Project: E-commerce Website Testing

Tester: Árvai Dávid

Test Type: Manual Functional Testing

Date: 29.05.2026

TEST ENVIRONMENT

- Browser: Opera GX 131.0.5877.111
- Operating System: Windows 11
- Environment: Staging
- Test Account: Tempo Mail
- Screen Resolution: 1920x1080
- Date of Testing: 29.05.2026

EXECUTIVE SUMMARY

During manual testing of the website's core functionalities, I identified several issues related to input validation, functionality, and user experience.

CRITICAL ISSUES

BUG-001

Title: Profile page crashes after browser refresh

Severity: Critical

Priority: High

Steps to Reproduce:

1. Login to an account.
2. Navigate to Profile page.
3. Refresh the browser page.

Expected Result:

The profile page should reload normally and display user information.

Actual Result:

The website crashes after refreshing the profile page.

Status:

Reproducible

404: NOT_FOUND

Code: `NOT\_FOUND`

ID: `fra1::xq4cp-1780156870311-c428ab08e141`

[Read our documentation to learn more about this error.](#)

BUG-002

Title: Password reset functionality not working

Severity: Critical

Priority: High

Steps to Reproduce:

1. Open login page.
2. Click "Forgot Password".
3. Follow recovery process.

Expected Result:

The password reset process should start successfully and a password recovery email should be sent to the registered email address.

Actual Result:

The password recovery process does not start and no password recovery email is received.

Status:
Reproducible

HIGH SEVERITY ISSUES

BUG-003

Title: Registration accepts invalid email format

Severity: High

Priority: High

Steps to Reproduce:

1. Open registration page.
2. Enter invalid email format (example: test123).
3. Complete registration.

Expected Result:

System should validate email format and display error.

Actual Result:

Invalid email addresses are accepted.

Parolă

BUG-004

Title: No email verification sent after registration

Severity: High

Priority: Medium

Steps to Reproduce:

1. Create a new account.
2. Check registered email inbox.

Expected Result:

Verification email should be sent.

Actual Result:

No confirmation email is received.

BUG-005

Title: Checkout form accepts invalid phone numbers

Severity: High

Priority: Medium

Steps to Reproduce:

1. Add a product to the shopping cart.
2. Proceed to the checkout page.
3. Enter an invalid phone number in the phone number field (e.g. "abc123", "123", or random characters).
4. Complete the remaining required fields.
5. Submit the order.

Expected Result:

The system should validate the phone number format and prevent order submission when an invalid phone number is entered.

An appropriate validation message should be displayed to the user.

Actual Result:

The checkout form accepts invalid phone numbers and allows the order to be submitted without displaying any validation error.

Status: Reproducible

BUG-006

Title: Weak password validation missing

Severity: High

Priority: Medium

Steps to Reproduce:

1. Create account.
2. Enter weak password that meets minimum length.

Expected Result:

System should require stronger password rules.

Actual Result:

Only minimum length is validated.

Examples:

- No uppercase requirement
- No numeric requirement
- No special character requirement

MEDIUM SEVERITY ISSUES

BUG-007

Title: Search field has no character limit

Severity: Medium

Priority: Low

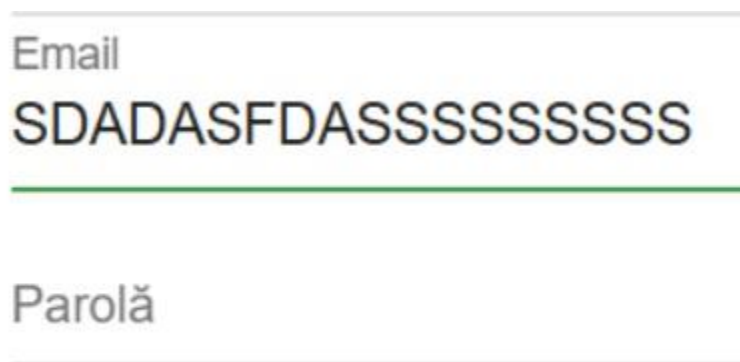

Expected Result:

Reasonable input limitations should be applied.

Actual Result:

No character limit detected.

Screenshot:

The screenshot shows a login form with two input fields. The first field is labeled 'Email' and contains the text 'SDADASFDASSSSSSSSSS'. The second field is labeled 'Parolă' (Password) and is empty. A green horizontal line is visible below the email field, indicating a successful validation or submission state.

BUG-008

Title: Profile page displays white screen/loading delay on first load

Severity: Medium

Priority: Medium

Expected Result:

Smooth page transition.

Actual Result:

White screen appears briefly before content loads.

BUG-009

Title: Profile image upload functionality not working

Severity: Medium

Priority: Medium

Expected Result:

Users should be able to upload profile images.

Actual Result:

Image upload unsuccessful.

Additional Observation:

Supported file formats are not displayed to users.

SALVEAZĂ

LOW SEVERITY ISSUES

BUG-010

Title: Missing back navigation on "Despre Noi" page

Severity: Low

Priority: Low

Expected Result:

User should have a clear navigation path back to previous page.

Actual Result:

No visible back navigation option found.

BUG-011

Title: No success or verification message after user registration

Severity: High

Priority: Medium

Steps to Reproduce:

1. Navigate to the registration page.
2. Fill in valid user details.
3. Submit the registration form.
4. Complete the registration process.

Expected Result:

After successful registration, the user should receive a confirmation message indicating that the profile was created successfully.

Additionally, if email verification is required, the system should display a message prompting the user to verify their email address and send a verification email.

Actual Result:

No success message is displayed after registration.

No indication is shown whether the account was created successfully or whether email verification is required.

NEEDS INVESTIGATION

OBS-001

Title: Empty fields displayed unexpectedly

Description:

During initial testing some fields appeared empty unexpectedly. Exact reproduction steps could not be identified.

Recommendation:

Additional investigation required to determine root cause.
